

See us at the show!

EVS Metal will be exhibiting at the Mid-Atlantic Job Shop Show. The Job Shop Show features the latest technologies for forming, fabricating, finishing and assembly of metal, plastic, rubber, and electronics. We invite you to come visit our booth and take a look at a sampling of our capabilities. We will have experienced and knowledgeable personnel available to answer your questions, provide technical information, and help you with the solutions you need for your sheet metal requirements. The show, which will be held at the South Jersey Expo Center in Cherry Hill, New Jersey, runs for three days starting Tuesday May 4th. The show hours are Tuesday May 4th 10:00-3:30, Wednesday May 5th 9:30-4:00 and Thursday May 6th 9:30-3:30. The EVS Metal booth location is J-06, please stop by and see us. You can go online to get more information about the show, register for free admission, obtain a list of exhibitors, and get directions, maps, and hotel information. Visit the Job Shop Show online at www.jobshopshows.com/cherryhill99. While you are online remember to visit the EVS Metal website at www.evsmetal.com. We hope to see you there!

Hot off the press

We are happy to announce the recent completion of our newly updated corporate literature. The new literature highlights our capabilities and services as well as details of our manufacturing machinery. Please contact us and we will be sure to send you a copy.

Out with the old...

**In
with
the
new!**

The Turret Punch Press is the heart of the fabrication process. In order to continually supply our customers with the highest quality fabricated parts at competitive prices it is imperative that we have the most modern, up-to-date

equipment available. It is for this reason that EVS Metal has replaced our Strippit® 1000-XP turret presses with two brand new Strippit 1000-H turret presses. While continuing to use affordable Fab style turret tooling, which is well suited to the thinner gauge materials used in most of today's electronic chassis, the 1000H adds a rugged bridge-frame construction and a high speed, servo-driven hydraulic ram. The tool load has been increased to a 42-station turret including 4 indexing stations, resulting in reduced set-up time and faster throughput! The brush table provides quiet, low friction sheet support enhancing the productivity of nested parts while minimizing scratching. The new Strippit 1000-H turret presses are another tool helping EVS Metal move into the new millennium.

World Class Quotes

"There is no reason anyone would want a computer in their home."

Ken Olson 1977
(Founder, Chairman, and President of Digital Equipment)

"640k ought to be enough for anybody."

Bill Gates 1981

"Always do right-this will gratify some and astonish the rest."

Mark Twain

FABFACTS

One quick look at the world we live in will tell you; technology is the key to success. At EVS Metal, we apply this thinking to every aspect of our business, particularly in Engineering. Utilizing state-of-the-art computer hardware and SolidWorks® 3-D modeling software, we are able to offer benefits that other fabricators simply cannot. These include full 3-D solid modeling capability which is applied to all customers' parts, assembly of complex systems for analysis of fit, function, and possible interference, as well as instant accurate unfolding of even the most complex sheet metal part. With the ability to exchange information electronically in 2-D (.DXF, .DWG, and IGES formats) and 3-D (ProE®, SolidWorks®, IGES, and CadKey® formats) EVS Metal has increased throughput, minimized errors, and expanded engineering and design services. The end result? A "Solid" advantage for EVS Metal!
